PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate at SLIIT with hands-on experience in Machine Learning, Deep Learning, and AI-driven automation. Skilled in developing intelligent systems, optimizing machine learning models, and integrating AI solutions into full-stack applications for real-world use. Seeking an AI/ML Engineering Internship to apply technical and analytical skills to impactful projects.

EDUCATION

Sri Lanka Institute of Information Technology

BSc (Hons) in Information Technology – Specialization in Artificial Intelligence

3rd Year Student | CGPA: 3.05 / 4.00

Malabe

2024-2028

PROJECTS

Garbage Image Classification (Deep Learning & Computer Vision)

- Developed a CNN-based transfer learning model for classifying waste across 10 categories
- Achieved 88.6% test accuracy through model tuning and optimization
- Applied data preprocessing and augmentation techniques to improve performance
- Evaluated model using confusion matrix and classification metrics
- Technologies: Python, TensorFlow/Keras, OpenCV, NumPy, Scikit-learn
- GitHub: SmartWaste Image Classification

Cyber Threats & Financial Loss Prediction (Machine Learning)

- Built a machine learning model to predict high-risk financial losses from cyber incidents
- Implemented models including Random Forest, CatBoost, and XGBoost
- Evaluated performance using Accuracy, Macro F1 Score, and ROC-AUC
- Performed feature engineering based on real-world cyber incident attributes
- Technologies: Python, Pandas, NumPy, Scikit-learn, CatBoost, XGBoost, LightGBM
- GitHub: CyberThreat Financial Loss Prediction

Smart Meal Planner (AI-Based Full-Stack Project)

- Contributed to the development of meal scheduling and leftover ingredient processing modules.
- Implemented AI-based leftover suggestions and personalized meal recommendations using TF-IDF
- Integrated meal management with inventory and RESTful backend services.
- Contributed to structured meal planning functionality to support efficient meal organization.
- Technologies: Python, React (Vite), JavaScript, FastAPI, MongoDB, TF-IDF, RESTful APIs, JWT
- GitHub: Smart Meal Planner

IT Asset Management Portal (Enterprise Full-Stack Application)

- Developed an IT asset management platform for allocation, support, and maintenance.
- Implemented authentication and role-based access control for Admin and Employee workflows.
- Integrated PostgreSQL using Spring Data JPA for efficient data management.
- Technologies: Java, Spring Boot, Spring Security, PostgreSQL, Thymeleaf, Bootstrap, Maven
- GitHub: IT Company Asset Portal

TECHNICAL SKILLS

- Programming** – Python, Java, JavaScript
- AI / Machine Learning** – Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision
- Frameworks & Libraries** – TensorFlow/Keras, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn
- Backend & APIs** – FastAPI, LLM APIs, Node.js, Express.js, REST APIs, Spring Boot
- Software Engineering** – OOP, Full-Stack Development, Database Design, Authentication & Authorization, JWT
- Tools** – Git, GitHub, Vercel, Render, Postman, Jupyter Notebook, VS Code, IntelliJ IDEA
- Soft Skills** – Problem Solving, Analytical Thinking, Fast Learner, Time Management, Communication, Adaptability
